

To Our Patients,

Our patients and our staff are so valuable to us. During this time, we want what is best for our patients and what is best for our team.

If you are not feeling well, we ask that you reschedule your appointment. Please do so as soon as possible so our team can adjust our appointment schedule accordingly. We know these appointments can be something patients look forward to and having to reschedule can be disappointing. However, we promise we will get you on the books when you are better.

Our team is crucial to our success. If our team members are not feeling well, they have been asked to stay home. We know that this may mean rescheduling appointments, and that can be frustrating. We will do our best to fit you with a different provider or on a different date that suits your schedule. We appreciate your flexibility.

Cleanliness is crucial in all that we do. As a medical practice, we must adhere to the strictest recommendations provided by the CDC, CDHP, and other local authorities.

As of now, our practice is open for business for our patients who feel well and are healthy.

If you are under the weather, please call to reschedule. Our front desk staff would be happy to assist you with rescheduling your appointment.

We know this is a stressful and unpredictable time - we will get through this together!
